1 Introduction and Structure of the Report

Dear lecturers,

this report informs you about the results of the evaluation conducted in your course using the **customized SET.UP questionnaire**. It provides an overview of your teaching aims and the opinions und assessment of the students in your course. Therefore, you were asked about your teaching aims for the course. Additionally, the students were asked about different aspects concerning the teaching-learning conditions and their individual learning outcomes. The aim of the report is to give you a platform to self-evaluate your teaching aims and outcome based on empirically founded data. The process comprises four steps. The structure of the report follows this four-step logic:

Step 1: Definition of your individual teaching aims

The survey is adjusted to your individual teaching aims and methods, which were defined beforehand. The teaching aims and methods, specified by yourself, are listed in **chapter 2**.

Step 2: Conduct of the survey

Depending on your teaching aims and methods defined before the survey, the questionnaire includes questioning modules related to the teaching-learning conditions and the learning outcome. You can find the students' responses **from chapter 3 onwards**.

Step 3: Discussion of the results with your students

The results of the evaluation can now be discussed with the students in your course. This will give you the opportunity to discuss the perceived strengths and weaknesses of the course with the students personally and to compare it with your own perception. Results of the lecturer survey of 2018 show that nearly a quarter of all lecturers do not discuss their evaluation results with their students. However, the review process and the thus resulting derivation of teaching improvements are essential components of the evaluation cycle (see figure 1).

Step 4: Further development of your teaching

If you are looking for new ideas or advice related to the subject of teaching, you can check the report's **last chapter** which provides you with further information on programmes and institutions (university-internal and -external).

2 Information provided by the Lecturers

Prior to the survey, you had the opportunity to define your teaching aims and name the teaching methods you were planning to apply in the course. The questionnaire is based on these learning aims and methods. Below, you can find an overview of the information indicated by you.

2.1 Defined Teaching Aims

Overview of teaching goals:

- Basic Knowledge (e.g. reproducing important concepts): **included**
- Specialized Knowledge (e.g. working through contradictions in the learning content): **included**
- Working Methods (e.g. looking more effectively for subject-related information): **not included**
- Presentation Skills (e.g. giving better presentations): **not included**
- Communication Skills (e.g. formulate more precise verbal statements): **not included**
- Cooperation Skills (e.g. contribute to the planning of the group work): **not included**
- Self-Responsible Working (e.g. setting better learning goals): **not included**
- Increased Interest in Subject (e.g. having learned things that I find exciting): **included**
- Combination of Practical and Theoretical Aspects: **included**
- Research: **not included**
- Teacher Training: **not included**
- Other teaching aim Question: Because of this course, I can. . . : **not included**

2.2 Applied Teaching Methods

Overview of teaching methods:

- Lectures (own presentation by the lecturer): **included**
- Student presentation (presentation by students): **not included**
- Lecturer-run discussion (discussion is led by instructor): **not included**
- Student-run discussion (discussion is led by students, e.g. following a student presentation): **not included**
- Exercises (e.g. solve exercise handouts): {Im6:item:text}
- Simulation exercises/Role-play (students as agents and decision makers in a simulation): {Im7:item:text}
- Case study (practical example cases that require processing a large amount of information): **not included**
- Group Work (independent work on a topic in groups): {Im9:item:text}
- Excursion (Field trip with a scientific or practical goal): {Im11:item:text}

3 Answers given by the Students

Below, you can find the answers provided by the students concerning their acquisition of competence and the teaching-learning situation in the course. If you did not choose any competencies, those will not be shown. 22 students have participated in the survey. That means that the results of the survey are based on **22 student opinions**.

The two cross-tabulations below show the joint distribution of the questions about the participation format in hybrid courses: *You indicated that this is a hybrid course. Which format of participation did you make use of more often?* and the behavior of the students in the course: *How often did the following apply?* Here, the respective participation format for hybrid courses is first crossed with 'active participation in the course' and then with 'time to discuss difficulties with any topics'.

Interpretation aid: In each cell of the cross-tabulation table, the number of cases is indicated to which a certain combination of expressions of the two questions applies. If an expression of the variable is not present in the data at all, this is marked with NaN (not a number).

Note: The percentages are the column percentages. Row and column totals are also given.

- + Herr Vrazitulis wirkte stets sehr motiviert und bemüht, was meinen eigenen Antrieb mich mit dem Thema zu beschäftigen verstärkt hat, obwohl ich initial wenig Lust auf die Veranstaltung hatte. + Viele Beispiele (auch aus der Linguistik) haben das Thema sehr anschaulich gemacht ++ Die bereitgestellten Lehrvideos hatten eine sehr hohe Qualität (inhaltlich und vom Productionvalue her) +++ Am besten an der Veranstaltung fand ich, dass alle Abgaben und Folien vom Anfang an freigeschaltet waren. Das hat mir ermöglicht mein Semester besser zu planen, in dem ich mehrere Abgaben auf einmal bearbeitet habe, und dann in den folgenden Wochen mehr Zeit

für andere Abgaben hatte.

- Die Videos der Vorlesungen. So konnte man sich selber einteilen wann man sich die Vorlesung angucken will.
- Die Videos sind grandios gestaltet und informativ. Bisher hatte ich eigentlich nur schlechte Erfahrungen mit Videos als Vorlesungsmaterial, da sie meist veraltet, fehlerhaft oder Aufnahmen von tatsächlichen Präsenzvorlesungen waren, welche eigentlich nicht als Videos erdacht sind. Deswegen war ich hier sehr positiv überrascht.
- Die neu aufgenommenen Videos sind wirklich sehr gut!
- Die vorab hochgeladenen Links für die YouTube-Videos waren sehr an-

schaulich gestaltet, sodass man alles verstehen / folgen konnte, auch ohne direkte Möglichkeiten für Fragen. Dazu trug auch die Bereitstellung von Skripten begleitend zu den Videos bei.

- Ich mag die Art und Weise, wie der Dozent alles erklärt. Die Videos haben viel geholfen die Themen besser zu verstehen. Man konnte merken, der Dozent hat viel Zeit in die Erstellung hochwertiger Lehrmaterial investiert. Das hat mich sehr motiviert.
- Vorlesungsvideos sehr verständlich und anschaulich
- die sehr gute Struktur und Organisation

Haben Sie Vorschläge, wie diese Veranstaltung verbessert werden könnte?

- /
 - Bei den Hausaufgaben, fände ich es besser, wenn ich für Bonusaufgaben keine extra Datei herunterladen muss. Außerdem, würde ich es begrüßen keine Datei, namens tinder.txt auf meinem PC zu haben.
 - Ich finde es zwar irgendwie sinnvoll, dass die letzten Abgaben Pflicht sind,
- da ja genau diese wohl sonst eher weniger bearbeitet worden wären, und ich so effektiv auch mehr Abgaben bearbeitet habe, als strikt notwendig gewesen wäre. Jetzt am Ende des Semesters grätscht es mir aber auch in meine Lern-Planung rein (da die Klausur ja auch direkt nach Ende der Vorlesungszeit ist), da ich jetzt doch proportional mehr Zeit dazu aufwen-
- den muss noch Abgaben zu bearbeitet, während ich eigentlich grade meine Zeit selbsteingeteilt zur Klausurvorbereitung nutzen möchte.
- Ich hätte mir gewünscht, dass es in den Präsenzvorlesungen abwechslungsreicher Übungen gegeben hätte.
 - Prüfungsorientiertere Aufgaben/ Probeklausur(en) wären sehr schön
